

# Simplify Your Life With SKT Managed Wi-Fi

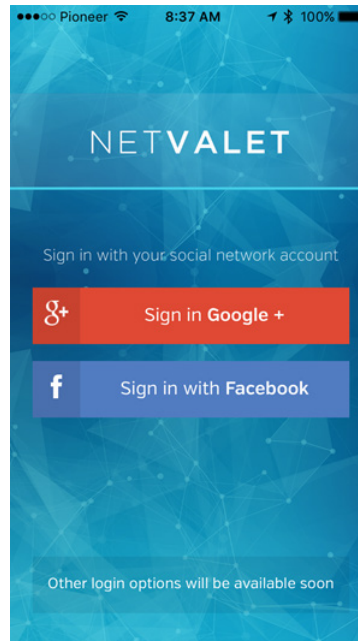

You love having a Wi-Fi network, but not the hassles of equipment upgrades and troubleshooting. That's why we now offer SKT Managed Wi-Fi. Our team handles it all for you, including installation, connecting devices currently in use, and troubleshooting. You can enjoy strong signals and fast Internet throughout your home or business.

This router lease program also allows you to take control of your Internet experience with the app, NetValet. The app is available in both iOS and Android versions. You may enable and control the many features anytime and anywhere with this mobile app.

The GigaCenter router with AC technology not only enables you to enjoy the fastest broadband speeds all over your house or business, but to enjoy it along with multiple HD streams, super-low latency gaming, and blazing-fast home networking all at the same time.

- Capable of speeds up to 1.3 Gbps
- Detects where devices are and intensifies the signal in their direction
- Firewall and security options with website filtering/blocking
- Routers are automatically updated to the latest software version

## NetValet

NetValet is available in the Apple App Store and Google Play. It requires Google or Facebook credentials to log in.

## Remotely Control Features

- Associate users with devices
- View devices connected to your Wi-Fi
- Set/edit Wi-Fi name and password
- Enact parental controls with Internet access and time blocking
- Set up a guest Wi-Fi
- Monitor Internet traffic/view the top 5 apps running at a time
- Re-associate a device with the router
- Simple set-up if router needs to be replaced

**“No-Worry” Router Lease Program for only \$9.99 Per Month and includes FREE INSTALLATION!**

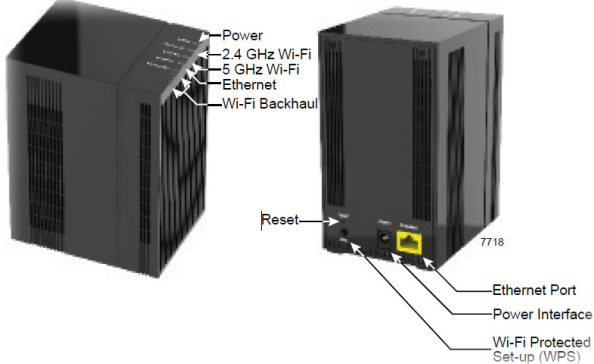

**Router is protected if it needs onsite service or replacement.**

## SKT Wi-Fi Mesh Satellite

If you need to expand your network, an SKT Wi-Fi Mesh will provide you with an additional access point, called a satellite. These satellites “mesh” with your GigaCenter to help you get a strong Wi-Fi signal and eliminate dead spots throughout your home, and even in your garage or backyard. The SKT Wi-Fi Mesh is easy to install, activate, and maintain. For only \$4 per month, you can lease the Mesh. FREE INSTALLATION or self-installation if preferred.

### Mesh Setup

1. Plug in power cord to the Mesh power port and into the wall outlet.
2. Press and hold the WPS button on the GigaCenter for at least 5 seconds, release the WPS and the LED will blink amber.
3. Go to the Mesh and hold the WPS button until the signal strength LEDs begin to flash (you have a maximum of 2 minutes between button pushes).
4. The devices should now be paired with each other.

If the signal strength indicator is red, the Mesh is too close to the router. When the LED display is all green or there are three green bars, they are at an optimal distance from each other. Two green bars means the distance between the router and the Mesh will provide adequate results. One green bar means the Mesh is too far from the router.

## SKT Managed Wi-Fi “No-Worry” Program

“No-Worry” Router Lease Program  
for only \$9.99 Per Month

**FREE INSTALLATION**

**Router is protected if it needs  
onsite service or replacement.\***

**Add an SKT Mesh  
for only \$4.00 Per Month**

### What is covered under the “No-Worry” program?

Managed router and Wi-Fi Mesh repair or replacement (due to normal wear and tear, act of God, and /or malfunction) is performed free of charge for customers in the program.

Repair or replacement of wiring between the inside wall jack and the router is covered in the program.

Only Calix GigaCenter routers and Wi-Fi Mesh provided by SKT are covered under the “No-Worry” program. Any router previously purchased is not eligible for this program.

SKT will assist program participants with connecting basic devices by phone and, if warranted, at the customer premises.

\*Minimum of 12-month agreement. Call for details.
